Here is a quick summary of the game.

MC Hammer teaches Martial Arts.. I recommend this game, BUT there are factors to consider: only people like me, who know the content of the books and like Brandon Sanderson's The Way Of Kings should buy this one. All the others, I don't think they could appreciate what there is to appreciate in this product. Another thing: this is like a tutorial of a game, not a game as we usually intend it to be. To say it simple: buy it only if you want to take a look at the Shattered Plains, the rockbuds, chulls and so on. Finished in a single session!. I'm not a fan of visual novels but by combining the story telling with proper gameplay elements this game manages to make me feel invested in what is going on and care for the characters.

The strategy part of the game is not very complex but it has a nice balance to always keep you on your toes. You are always short on supplies and resources, the survivor count is decreasing constantly and in most cases you are either worrying over the morale or the health of your people, or both.

The story comes up with some interesting ideas as well and (except for the very long opening sequence) feels very well paced.

Video with commentary:

<https://www.youtube.com/watch?v=Vz8BOi8zbXg>. Fantastic game. One of those games where you say "just a little longer" and look at the clock and see that 2 hours have passed. Buy it now.. A great little action platformer with a Halloween theme. Definitely worth your time.. so many hours of fun as a kid.. incredible game. The gameplay, apart from being translated, is left untouched, so the experience is still authentic. Recommended for those who cannot read Japanese and can care less about the missing trains in this release to play this game.

Just keep in mind that many JR trains, amongst more from private Japanese railway companies, are not available in the international release due to potentially inhibiting licensing fees and/or reasons undisclosed by the publisher of the International Release.

On the other hand, for those who can actually read Japanese, know Japan enough to lust for the missing trains, and has enough knowledge to buy the download store version from the ARTDINK online store, **BY ALL MEANS GO THERE INSTEAD**. More trains are available there and trains from JR Central can be added via the JR Central Addon Pack.. I have to say this game is really great. For what they were going for they were spot on. Definitely a nice JRPG with a variety of customization and very well optimized. I recommend it.. There's a user-defined tag for this product that reads "casual." I can't really say that this product is for the most casual observer of Go/Igo/Weiqi/Baduk.

However, what I can say is that if you're an amateur player looking for an AI Go sparring partner then here's your option on Steam. In fact, it appears to be one of the most compelling options at the moment for playing this game on Steam (the other being Tabletop Simulator if you have a friend).

Verdict: If you want to Go it solo on Steam (all easy puns intended) and practice against one of the more competent AI's on the market, here is your choice. But for \$80 let's hope that future updates or "The Second Edition" will be included.

I'll recommend it for the purpose of hopefully inspiring more products such as this to hit the Steam Store. With even more hope, I'd like to see something like KGS or Tygem on here as well.. So the best comparison i can make to this game would be the ultima 6 & 7. It's very old school and it does not hold your hand.

PROS

Wonderful puzzle clicker!

This game is a great little puzzler, a few "collect piece and put in things" bits, a few lock puzzles, a few pattern and number puzzles and a couple of really interesting maze locks.

Really short, but really fun!. The game is needlessly tedious in the way you play it, it's not like many other survival games where there is some excitement or a unique twist to balancing things, it's just, "Oh need food, oh now we need wood to make stuff to make more food, oh there's undead and we don't have enough soldiers." Just balancing things out in what is clearly an endless struggle, not worth your money.. Solid game but they aren't kidding about that partial control super glitchy with steam controller. But it seems like a solid game...FULL CONTROLLER SUPPORT PLEASE; come on guys.. Nice!

More Techs + new race.. **Assault on the Necrospire is a neat little *rogue-lite/dungeon crawler style game at a budget price. You only have one class to play as - a mage - and there are a ton of collectible artifacts and weapon upgrades dished out at an astonishing pace early on in the game. The bosses and enemies are well varied and interesting and the level layout is similar to Binding of Isaac with a square map with randomly generated rooms branching off of each other. The only real gripe I have is the sound - the music is sparse and repetitive and the sound effects lack the impact that makes hitting enemies and casting spells satisfying. Other than that \$5 well spent!. Pretty fun, actually, had my gf and I screaming orders at each other while having a blast. Gets hectic quick.. It is a kind of reloaded pacman with demons and 3d graphics which may not be the best but which are pleasant to watch as you can easily see your character and the other elements in the level.***

An issue though is the lack of customisable settings and resolution.. I like puppers

I like Turbo

Overall I like game.. A cute but difficult tower defense game with a christmas theme. It looks and feels like the mobile port it is. You don't place towers, you drag them into position. The maps are designed with a lot of micro-management involved, simply placing towers isn't enough, you may need to sell them to get money, which then allows you to place another tower elsewhere. You need to time the placement, upgrading, and selling of towers, with the amount of resources you have to ensure you have enough free resources to place the exact tower you need to beat/finish off that particular wave. (It's actually simpler than I'm making it sound here.)

What is tricky is the timing, which you only achieve through experience. Your defences might have held against the previous wave, but even just upgrading what you have might not beat the new one. You might have to sell some towers and/or exchange them with others depending on the wave.

Overall, I didn't particularly enjoy the micro-management and found it frustrating to get a long way into a level, only to lose because I messed up the timing or placement of a single tower. However, the graphics, sound, and gameplay were solid and it's very cheap. If you like micro-management and time management, then the game might appeal to you, but check out the gameplay on youtube first!
